Project-Task1 Teamwork - Art Gallery Web Site (Prof. Min)

Design and Implement Web Site (Art Gallery) by each Team (Prof. Min).

Estimated Work Hours: 40 hours in total. Max 1000 points for each team member.

This project is a teamwork as each team member contributes his/her share. Note. Task03 Lab14 should be used as a base code and supporting materials for this project.

The web site provides user-interface (web pages) interacting with Apache server (php codes) with MySQL database, to do the following tasks with various objects listed above: (1) to view the objects (of a kind/type), (2) to select an object (of a kind to view its description or detail), (3) to add an object, (4) to delete an object, ~~(5) to update an object, (6) to do ad-hoc query to search object(s).~~

Each object of a kind/type could be (as in art database): (1) artists, (2) paintings, (3) galleries, (4) eras, (5) genres, (6) subjects, (7) paintnggenres, (8) paintingsubjects.

Your team task for this project is to design, implement, test, document ("**draft**" technical document), and deliver a web site. Your team will identify each component of the web site to design (including use case document with sequence diagram) and document the project (with a technical documentation).

The "draft" document should include all the documentation of **only what you have worked and are responsible** for this part of the project. It should include ~~overall web-site diagram of architecture/organization,~~ use-case document of each functions that you have done, ~~sequence diagram,~~ user interface of each web-page and its screenshot), listing of codes (html, css, javascript, php, sql db/tables), data-dictionary of database/tables, run-log (step by step of run with screenshots, etc.).

Your document should be well-documented (easy to follow for your reader) with cover page, table of contents, heading and subheadings for each part. Provide also in the beginning of the document a list of worklist (a list of team members, list of work items of the project assigned to and done (stating how much is done in percent) by each member), list of code/module (HTML, CSS, Javascript, PHP files) and brief description of each module.

Note. The **full-detailed** technical-documentation will be assigned later as a separate project task.

Submission: Submit your teamwork of this project to (1) elearning/canvas (this item), (2) Team's folder in box, (3) Individual folder in box. Create a folder (Project-Task1) to include all the work done for this project. Submit (1) the folder to box (team's folder and individual's folder) and (2) its zip file to canvas.
